IMPORTANT INFORMATION

The terms and conditions are indicative and may change with market fluctuations.

Prior to any investment in the product described herein, investors should make their own appraisal of the risks from a legal, tax and accounting perspective, without relying exclusively on the information with which they were provided, by consulting, if they deem it necessary, their own advisors in these matters or any other professional advisors. Subject to compliance with legal and regulatory requirements, Société Générale may not be held responsible for the financial or other consequences that may arise from the investment in this product.

This product may be subject to restrictions with regard to certain persons or in certain countries under national regulations applicable to such persons or in said countries. It is each investor's responsibility to ascertain that it is authorised to invest in this product. By investing in this product, each investor certifies that it is duly authorised to do so.

For the products benefiting from a guarantee by Société Générale or by any other entity of Société Générale group (hereinafter referred to as the "Guarantor"), the due and punctual payment by the principal debtor of the obligation of any sums due in respect of these products is guaranteed by the Guarantor according to the terms and subject to the conditions set forth in a guarantee available from the Guarantor's office on request. Consequently, the investor bears a credit risk on the Guarantor.

Insofar as payments are due by Société Générale (or any successor) in its capacity as counterparty, debt issuer, depositary bank or guarantor, investors are exposed to a credit risk on Société Générale (or such successor). In the case where payments are due, for any reason, by an entity other than Société Générale and Société Générale does not act as guarantor, investors are exposed to a credit risk on such entity. In the specific cases of credit derivative transactions and credit linked notes, investors will also be exposed to the credit risk on the reference entity(ies).

For products whose payment or redemption formula include a protection or a guarantee of the capital, such protection or guarantee of the capital is only assured on maturity date. Thus, the price of such products can, during the course of their life, be lower than the level of this protection or guarantee of the capital. Furthermore, the attention of investors is drawn to the fact that this protection or guarantee of the capital implies that Société Générale and/or any of its subsidiaries enters into hedging transactions, the unwinding of which, in the event of a repurchase or redemption of such products before the maturity date, can have an impact on the liquidity of such products and have an effect on the market price of such products (in particular, on the "bid offer" spread that Société Générale may propose from time to time, under normal market conditions, for the repurchase of such products). Société Générale and/or its subsidiaries cannot assume any responsibility for such consequences and for their impact on the investment.

If, for a given product, the protection or the guarantee of the capital at its maturity date depends on certain market conditions being met, such as, for example, conditions relating to the performance of the underlying, investors should be aware that such protection or guarantee of the capital shall only apply on the maturity date, if such market conditions are met in accordance with terms and conditions of the product. In a worst case scenario, investors could sustain an entire loss of their investment.

For products which are not capital guaranteed, the redemption value of such products may be inferior to the amount initially invested. In a worst case scenario, investors could sustain an entire loss of their investment.

Certain products offered by Société Générale may include embedded leverage. As a result, the value of such products is likely to reflect, in an enhanced way, the variation of the value of the underlying(s).

The attention of investors is drawn to the fact that, until the maturity date of the product, the price of the product can be subject to an important volatility due to the evolution of market parameters, including the price of the underlying instrument(s) and the interest rates. Investors should be aware that in certain circumstances, the price of the product may be substantially less than the amount initially invested.

The fluctuations in the marked-to-market value of certain products may oblige the investor to make provisions or resell in whole or in part these products before maturity, in order to enable the investor to comply with its contractual or regulatory obligations. As a consequence, the investor may have to liquidate these products under unfavourable market conditions. This risk will be even higher if these products include a leverage.

For certain products, there is no liquid market on which such products can be easily traded, and this may have a material adverse effect on the price at which such products might be sold. Although there is no undertaking from Société Générale to buy back such products or propose prices during the life of such products, Société Générale may contractually commit to do so under normal market conditions. In such a case, the execution of this commitment shall depend on the liquidity conditions of the underlying and the price of such products will include the hedging and/ or unwinding costs generated by such a buy back for Société Générale. Those costs will highly depend on market conditions at such time.

The documents relating to this product will provide for methods of adjustment or substitution in order to take into account the consequences on this product of extraordinary events which may affect one or several of the underlying instruments on which it is based or, as the case may be, the early termination of this product.

When simulated performance or past performance are displayed, the figures relating thereto refer to past periods and are not a reliable indicator of future results. When future performance is displayed, the figures relating to future performance are a forecast which is not a reliable indicator of future results.

Furthermore, where past performance or simulated past performance rely on figures denominated in a currency other than that of the country of residence of an investor, the return for such investor may increase or decrease as a result of currency fluctuations. Finally, when simulated performance or performance (whether past or future) are displayed, the potential return may also be reduced by the effect of commissions, fees or other charges.
