Risk Factors

Potential investors are urged to consult with their legal, regulatory, investment, accounting, tax and other advisors with regard to any proposed or actual investment in these Notes.

Please see the Base Prospectus and applicable Final Terms for a full detailed description of the Notes and in particular, please review the Risk Factors associated with these Notes. Investing in the Notes entails certain risks including, but not limited to, the following:

Adjustments: The terms and conditions of the Notes will allow the Determination Agent to make adjustments or take any other appropriate action if circumstances occur where the Notes or any exchanges are affected by market disruption, corporate events or circumstances affecting normal activities.

Credit Risk: The holder of the Notes will be exposed to the credit risk of the Issuer.

Event Risk: If an event occurs which in the opinion of the Determination Agent may have a diluting or concentrative effect on the value of the Underlying, the Determination Agent will have discretion to make changes to the terms of the Notes to account for any such effect; and such changes may affect the value of the Notes. If the Determination Agent determines that the event will not have a diluting or concentrative effect on the value of the Underlying, the Determination Agent will not adjust the terms of the Notes.

Exit Risk: The secondary market price of the Note will depend on many factors, including the value and volatility of the Underlying, interest rates, the dividend rate on the Underlying, time remaining to maturity and the creditworthiness of the Issuer and the Guarantor. Therefore the holder may receive an amount which may be less

that the then intrinsic market value of the Note and which may also be less than the amount the holder would have received had the holder held the Note through to maturity.

Hedging Risk: On or prior to and after the Trade Date, the Issuer, through its affiliates or others, will likely hedge its anticipated exposure under the Notes by taking positions in the Underlying, in option contracts on the Underlying or positions in any other available securities or instruments. In addition, the Issuer and its affiliates trade the Underlying as part of their general businesses. Any of these activities could potentially affect the value of the Underlying, and accordingly, could affect the payout to holders on the Notes.

Liquidity Risk: [The Notes will not be traded on an organized exchange.] The Dealer will make a secondary market in the Notes on a reasonable efforts basis only and subject to market conditions, law, regulation and internal policy. The liquidity of the Notes reflects the liquidity of the Underlying and even whilst there may be a secondary market in the Notes it may not be liquid enough to facilitate a sale by the holder.

Market Risk: Price movements in the Underlying may not correlate with each other. Increases in the value of one or more of the Basket Components may be moderated, or wholly offset, by lesser increases or declines in the value of one or more of the other components.

No Shareholder Rights: A holder of Notes will have no beneficial interest in the Underlying nor any voting rights and will not have the right to receive dividends or other distributions with respect to the Underlying

Potential Conflict of Interest: The Determination Agent (MSIL) is an affiliate of the Issuer and the economic interests of the Determination Agent may be adverse to the interests of holders of the Notes. Determinations made by the Determination Agent, including in the event of a market disruption or corporate event affecting the value of the Basket Components or trading on the relevant Exchange, may affect the amount payable to holders pursuant to the terms of the Notes.

Underlying Issuer Risk: The issuer of the Underlying is not an affiliate of the Issuer or its affiliates and is not involved with this offering in any way. Consequently, the Issuer and its affiliates have no ability to control the actions of the issuer of the Underlying, including any corporate actions that could trigger an adjustment to the terms of the Notes by the Determination Agent.
